

Story Board: Photo Album

by Paulo Garcia and Joshua Cross

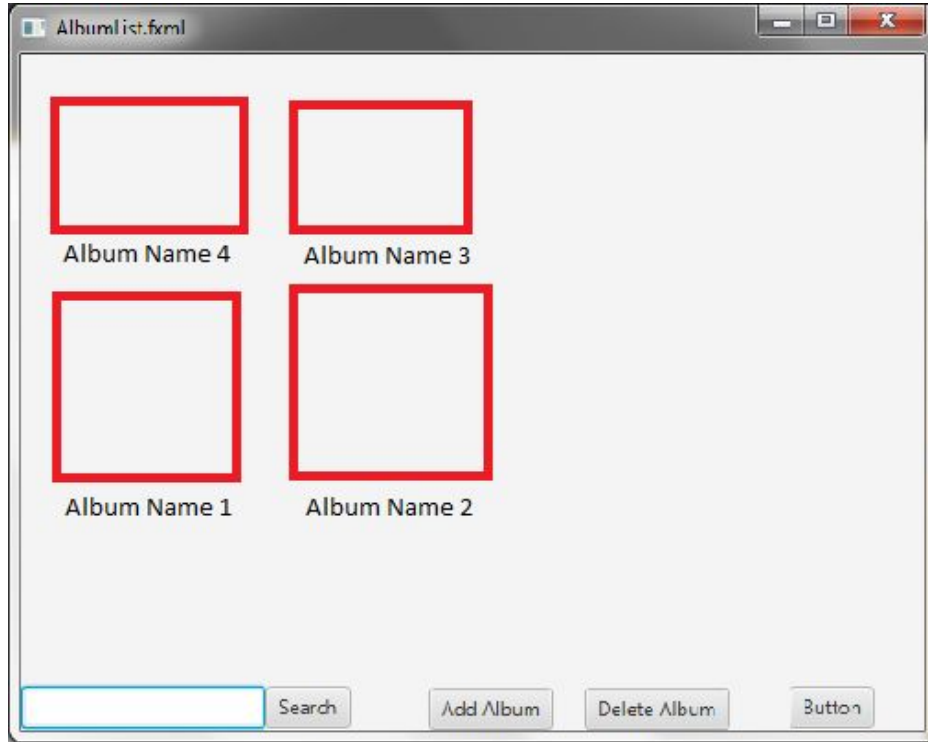

The Login page allows users to Enter their Login information.

- Type UserName
- Type Password
- Login activates event handling and decides whether the username is an admin or not

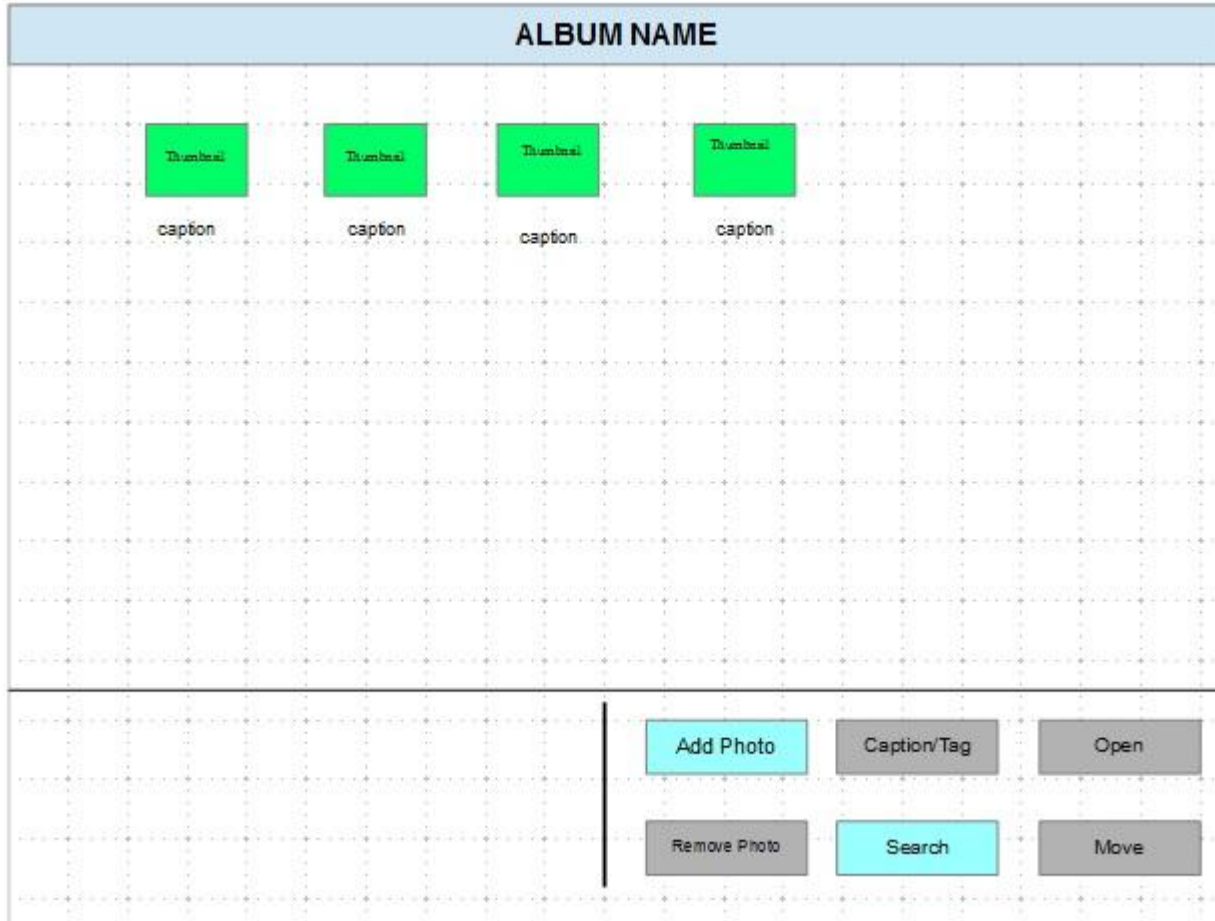

The Admin View is for Admin only:

- List Users List usernames on the window
- Create users will add new Username and New Password to the user list
- User Delete will delete a typed username
- Delete Selected user will delete username selected on the list view

Album List View:

- Search bar would allow users to search for an album or photo name
- Each album is selectable
- Add Album will open a new window which allows the user to create a new album
- Delete album will delete the selected album
- Open will open the album

Default Thumb Screen:

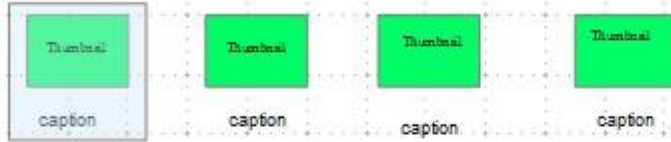

Selecting an album brings you here. Default start position has no photo selected. Notice most of the interaction buttons are greyed out.

Until you select a photo, you can only add or search.

Most work will be done here. In the next few slides I will show how the bottom button and preview panel will change context when one of the action buttons is selected.

X'ing out of this will bring you back up to the album select view. (as will any of the variations of this thumb screen.)

ALBUM NAME

Move

Photo selected Thumb Screen:

Once a photo is selected, the rest of the action buttons become clickable.

The preview pane shows the selected photo and all current captions/tags/date.

You can now move this picture to a new album, remove it from the current album, Open the photo (this moves you into SlideShow mode), Edit/Add caption or tags.

As well as launch the search or add mode options still.

Cancel

Add Photo Mode:

Selecting “Add” from the default thumb screen changes the context of the action button area.

Here you can select the photo you wish to add to your current album.

As well as add a caption or tags (optional) At the time of the add.

Cancel sets you back to default thumb mode.

Are You Sure You Want To Remove This Photo?

Remove Photo

Cancel

Remove Photo Mode:

Again, selecting remove from the photo selected thumb screen changes the action button area.

Basically you can proceed with removing the photo, or cancel back to the thumb screen.

Move

Cancel

Move Photo Mode:

Here you can move your selected photo to another album.

By selecting the album from a tree view of the folder list, or typing the album name into the text field.

As always, you can cancel back to default thumb mode.

- ☒ Caption
- ☐ Tag: Place
- ☐ Tag: Person
- ☐ Date

Search Mode

Search for:

Create Album

Search

Cancel

Search Mode 1:

You select the type of search you want with the radio buttons in the preview field.

The thumb area will be cleared until you execute a search, filling in with the search results.

Once you have the results, the “create album” button will become active, letting you make a new album containing the results of your search.

Searching by date will result in a small change to the search for, as seen in the next slide.

Search Mode 2 (Date):

If the radio button for search by date is selected, you get a field for start/end dates to search by.

The rest of the functionality remains the same.

Open / Slide Show Mode:

Selecting "Open" from the default thumb screen moves you into slide show mode.

Here you can scroll forwards and backwards through your current album.

Viewing the pictures with all captions and tags, but no editing or changes will be allowed from this mode.

X'ing out of this will bring you back to the thumb view of the current album
